PROFILE

I graduated in Computer Science from the University of Azad Jammu And Kashmir in 2020. Following my graduation, I encountered limited internships and job opportunities due to the impact of COVID-19. However, I utilized this time to embark on a freelancing career, primarily focusing on graphic design projects. After that, I worked for a company named **BEART AND GIBSON** as a Graphic Designer. While developing my skills as a graphic designer, I discovered my passion for Python development and decided to transition my career path. I have acquired a solid understanding of Python fundamentals, including frameworks and object-oriented programming (OOP). I was embarking on a new chapter as a professional Python developer and contributing my expertise to an organization such as **MAXI SOLUTIONS**. Currently, I am a Python Developer (Flask, Django, Selenium, and Beautiful Soup) in **MEDS IT NEXUS** since January 1st, 2023, and I continue to work there , where I continue to expand my knowledge and skills in Python development.
